Here's a round-up of what TV critics are saying: AV Club: (opens in new tab) "The chemistry and interplay among the crew of the Rocinante has always been a major draw, and here, it's more or less a most point, with each one stranded from the rest, isolated in part by the massive crisis that serves as the season's main threat. The fact that this works as well as it does is both a testament to the quality of the source material, and proof positive of how much time the show has put in making sure all of its core cast is worth watching."Paste (opens in new tab): "Having its core characters so dramatically isolated means that the action in Season 5 is, by necessity, much slower than a lot of fans will be used to—and The Expanse already had the capacity to be a pretty slow show."Den of Geek (opens in new tab): "The emotional stakes are high in The Expanse season 5, and although the action takes a few episodes to really kick in, once things shift into high gear, it's full speed ahead." Ars Technica (opens in new tab): "The Expanse's fifth season is the best since its first, a long-awaited high-stakes payoff to several seasons' worth of setup. If you drifted away from the show during earlier seasons, like something accidentally dropped in microgravity, this new season makes it worth finding a way to come back. "Comics Beat (opens in new tab): "If you want a gritty sci-fi space show, The Expanse is still your best bet. Really, truly. It just has it all-mostly realistic physics, interesting politics, a diverse and excellent cast, well-plotted story, and character arcs-but I still saw the same flaws that I expressed in my fourth season review. Namely, that The Expanse needs a Big Bad who's more than a monologuing polemicist (Marco) or possibly evil aliens (that's still vague).
